

BETTER SCIENCE. BRILLIANT WATER.®

CUSTOM SOLUTIONS FOR UNCOMMON WATER

Evolve Air models are designed to be the most versatile filtration systems available. Whether your home suffers from rust stains, odor, foul taste, acidic water, or organic particles, there is an Evolve Air filter perfect for you.

Our Evolve Air models use a unique air-induction process that oxidizes dissolved iron, manganese or sulfur into solid particles. This greatly enhances the effectiveness of the filtration process for an efficient and environmentally friendly system.

Your water is unique, so don't choose just any filtration system. We will customize your filter with the media that best fits your water issues. You can be confident that you have the correct solution to fix your problem water once and for all.

QUALITY YOU CAN COUNT ON

System Features:

- Environmentally safe — no chemicals
- "Inchworm" — our patented air release technology
- Easily programmed for optimum performance
- Advanced history and diagnostic screens
- Extremely low cost operation
- Includes battery backup
- All components are certified NSF/ANSI 61 compliant

Every home deserves the right filtration system to provide good quality water. As your authorized Evolve dealer, we will custom-engineer the precise home filtration system to fit your needs.

PREVENT BACTERIA WITH OZONE*

- Reduces tough bacteria in filter tank
- Chemical-free, environmentally safe
- LED light to indicate system operation
- Audible notification when service is required

**Optional attachment. Not compatible with birm media.*

THE BETTER WATER YOUR HOME DESERVES.

Nuisance water comes with a variety of different problems. Our Evolve Air filters can be customized with the media that best fits your unique water. See the media options below for available solutions.

The system will clean itself using only air and water to backwash and flush the system of any contaminants. The rugged control valve handles high flow rates without dropping household water pressures — such as times when showers, toilets, and faucets are all in use.

Inch Worm is an adjustable cycle that allows the control valve to slowly “inch” its way into backwash, allowing air to escape slowly instead of in one big rush. This slow release virtually eliminates the thrashing of drain lines or noisy discharge of air to the drain when the system first initiates the backwash cycle.

See how it works!

Visit EvolveSeries.com to watch the cycle process for filtration systems.

SOLUTION-DRIVEN MEDIA OPTIONS:

We may recommend a mixture of medias, depending on your unique water conditions, water source, and well system. This versatility customizes your filtration system to match your needs and enhance performance.

Activated Carbon	Turbidex	Calcite	GreenSand Plus	Birm
<ul style="list-style-type: none"> • Reduces hydrogen sulfide and chlorine • Filters dissolved organic compounds • Exceptionally high capacity and efficiency 	<ul style="list-style-type: none"> • Removes turbid particles by both physical and electrostatic adsorption • Light-weight material capable of high flow rates 	<ul style="list-style-type: none"> • Naturally occurring white marble media • Neutralizes acidic waters to prevent damage to fixtures and plumbing 	<ul style="list-style-type: none"> • Reduces iron, manganese, and hydrogen sulfide • No need for a pre-filter • No lengthy startup periods 	<ul style="list-style-type: none"> • Highly efficient iron and manganese removal • Durable media for a long life span • Handles a wide temperature range
